# JET01

CE

SELECTOR AND PROGRAMMER FOR PLUS

JET01 is a device designed to work with the PLUS control panel.
JET 01 works as selector or programmer to change the PLUS panel parameters.
The keypad can be locked and unlocked with a simple procedure and in any case it will lock after 30 sec. of non-use.
The selector allows you to scroll through the six positions.
Programming parameters are password protected.
The reset button allows the remote reset.

1   WIRINGS

2   SELECTOR

Press UP or DOWN to scroll through the six selector positions: AUTO (flashing dash), PARTIAL(PA), OPEN(oP), ENTRY(En), CLOSED(CL), OUT(ot).

3   PROGRAMMER

To enter in programming mode press and release the SET button. Enter the password to go in basic menu or enter the password to go in detailed menu. See the PLUS manual for programming and parameters details.

4   LOCK / UNLOCK

To lock the keyboard keep down SET button until the display shows two fixed dashes.
To unlock the keyboard keep down SET button until the display flash.
The control board automatically locks after 30 sec. of non-use.
When the control board is locked, you can not see any alarms. To see the alarms, unlock the control board.

5   RESET

Press RESET button to reset JET01 panel and PLUS control panel.
The reset key is also active when the card is locked.

6   ERROR

The appearance of the fixed word "Er" indicates a communication problem with the motherboard.
Check wiring between motherboard and selector.
